Monroe, NJ | (732) 639-4278 | jsciacca03@gmail.com | jamesosciacca.com

Professional Summary

Project Coordinator at Isos Technology and Rutgers Computer Science graduate with a background in enterprise IT and web development. Supports technology initiatives through status tracking, documentation, and stakeholder communication; brings hands-on product ownership and development experience from building JWSites.

Professional Experience

Isos Technology

Sept 2026 – Present

Project Coordinator

Remote

- Support project managers in coordinating technology initiatives, maintaining project documentation, tracking status, and communicating progress.
- Track project work in Jira and maintain Confluence documentation to keep project activities and updates visible to stakeholders.
- Coordinate meetings, deliverables, action items, and follow-ups to support milestone progress and organized project execution.
- Collaborate with technical and business stakeholders to clarify project updates and maintain alignment on ongoing work.

RWJBarnabas Health

June 2026 – Sept 2026

Field Services Analyst

New Jersey

- Resolved hardware, software, Windows, printer, and network issues in an enterprise healthcare environment; documented incidents and coordinated troubleshooting with IT teams.
- Configured, deployed, and maintained workstations, laptops, peripherals, and mobile devices to support staff productivity and minimize downtime.

Projects

JWSites | AI-Assisted Website Platform & Service

jwsites.net

- Designed and developed an AI-assisted website platform and service, owning product direction, web development, and deployment.
- Manage product development alongside business development and prospective client acquisition, connecting technical delivery with the service offering.

JAMA Network Monitoring Dashboard

April 2026

- Built a full-stack React, Node.js, and Express application to monitor website uptime and latency through REST APIs and performance telemetry.
- Developed backend metric collection services and deployed the application using GitHub Pages and Render.

Personal Portfolio Website

May 2023 – Present

- Build and maintain a responsive React portfolio showcasing technical projects, certifications, and professional experience using JavaScript and HTML/CSS.
